

VALIDATING THEORETICAL FLOW CONSTRAINTS WITH LIVING DIATOM  
CULTURES

Theresa Cacek and Matthew Julius

Department of Biological Sciences, St. Cloud State University, St. Cloud, MN, 56301,  
USA

Stepanek made a mess in the herbarium  
With glycerin, diatom models, and an aquarium.  
After great effort I was able to make the equipment go  
Making it possible to measure real diatoms in flow  
And keep Julius from going to the sanitarium.
