

*STEPHANODISCUS THERIOTENSIS* A NEW DIATOM FROM THE LAURENTIAN GREAT LAKES

Intana Chanthirath and Matthew Julius

Department of Biological Sciences, St. Cloud State University, St. Cloud, MN, 56301, USA

There once was a diatom from Superior  
Who felt its absence of a character was inferior.  
Rather than keep its anatomical deficiencies quiet,  
It decided to take a name in honor of the "The Riot"  
And be proud of its limited exterior.
